Index

IEE Proceedings Part H
Microwaves, Antennas and Propagation
Vol. 136, 1989

ABBREVIATIONS

- p paper, address or lecture
- d discussion on a paper
- a abstract of paper or address
- e errata
- s synopsis of a paper published in full in another Part of the IEE Proceedings

Author index

A

Aberle, J.T., and Pozar, D.M. Analysis of infinite arrays of probe-fed rectangular microstrip patches using a rigorous feed model p110
Aboul-Saoud, A.K., Kheirallah, N.H., and Rashwan, H.M. see Kheirallah, N.H.
Accatino, L., and Bertin, G. see Bertin, G.

Subject index

ANTENNAS

Lens antennas with amplitude shaping or sine condition. S. Bishay, S. Cornbleet and J. Hilton p276

ANTENNAS (ADAPTIVE)

Beamspace partially adaptive antenna. K. Takao and K. Uchida p439
Broadband and robust adaptive antenna under correlation constraint. N. Kikuma and K. Takao p85
Directional constrained adaptive array using symmetric amplitude control. K.W. Lo and T.B. Vu p90

ANTENNAS (APERTURE)

Antenna beam steering technique using dielectric wedges. H.D. Griffiths and M.R. Khan p126
Aperture field and circuit parameters of a cavity-backed slot radiator. A. Hadidi and M. Hamid p139
Aperture impedance of flared horns. J.W. Silvestro and R.E. Collin p235
Dielectric corrected plane reflector: an unusual solution. S. Cornbleet p377
Stereographic projection of axisymmetric nonuniform lens media. S. Cornbleet p499

ANTENNAS (ARRAYS)

Analysis of curtain arrays for HF broadcasting. A.G.P. Boswell p179
Analysis of infinite arrays of probe-fed rectangular microstrip patches using a rigorous feed model. J.T. Aberle and D.M. Pozar p110
Directional constrained adaptive array using symmetric amplitude control. K.W. Lo and T.B. Vu p90
Experiments of circularly polarised printed slot array antenna. K. Nakaoka p70
Generalised Villeneuve $\bar{n}$ distribution. D.A. McNamara p245
Investigation into the multipath performance of self-phased array. P.V. Brennan p47
Microstrip port design and sidewall absorption for printed Rotman lenses. L. Musa and M.S. Smith p53
Theoretical design/synthesis of slotted waveguide arrays. A.J. Sangster and A.H.I. McCormick p39

ANTENNAS (DIPOLE)

Semiconductor dipole: possible radiating element for microwave/millimetre-wave monolithic integrated circuits (MIMICs). P.D. Patel p455
Theoretical and experimental investigations of two-dimensional waveguide-excited short backfire antenna structure. M.S. Leong, P.S. Kooi, . Chandra and T.S. Yeo p263
Vertical monopoles embedded in a dielectric substrate. R.C. Hall and J.R. Mosig p462

ANTENNAS (HORNS AND FEEDS)

Aperture impedance of flared horns. J.W. Silvestro and R.E. Collin p235
Gaussian beam model for aperture-controlled and flareangle-controlled corrugated horn antennas. P.-S. Kildal p424
Intrinsic mode theory of conical corrugated horns. J.M. Arnold and A. Dendane p250
Magnetically coated horn for low sidelobes and low cross-polarisation. J.J.H. Wang, V.K. Tripp and R.P. Zimmer p132
Propagation and radiation from partly filled elliptical wave guide. G.L. James p195
Reflection coefficient at the feed of a radome-covered reflector antenna: a geometrical optics approach. H. Cory, P.D. Einziger and R. Sover p241
Simple primary focus feeds for deep reflectors. A.A. Kishk p169
Theoretical and experimental investigations of two-dimensional waveguide-excited short backfire antenna structure. M.S. Leong, P.S. Kooi, . Chandra and T.S. Yeo p263

ANTENNAS (MEASUREMENTS)

Analysis of gating errors in time domain antenna measurements. A. Henderson, J.R. James, P. Newham and G. Morris p311
Near-field measurements on plane-polar facility. J.C. Bennett and K.S. Farhat p202
Phase-only reflector antenna metrology. C.G Parini, A.K.K. Lau and P.J.B Clarricoats p343

ANTENNAS (MICROSTRIP)

Analysis of circular microstrip antennas with superstrate. K.M. Luk, W.T. Tam and C.L. Yip p261
Analysis of infinite arrays of probe-fed rectangular microstrip patches using a rigorous feed model. J.T. Aberle and D.M. Pozar p110
Analysis of reactively loaded microstrip disk antenna. M.D. Deshpande and Y.R. Rao p417
Application of sequential feeding to wide bandwidth, circularly polarised microstrip patch arrays. P.S. Hall p390
Capactive matching of microstrip patch antennas. M.J. Alexander p172
Coupling across gap in thick microstrip line. P. Newham p64
Design principles of sequentially fed, wide bandwidth circularly polarised microstrip antennas. P.S. Hall, J.S. Dahele and J.R. James p381
Equivalence of impedance and radiation properties of square and circular microstrip patch antennas. A.K. Bhattacharjee, S.R. Bhadra Chaudhuri, D.R. Poddar and S.K. Chowdhury p338
Experiments of circularly polarised printed slot array antenna. K. Nakaoka p70
Extended analysis of closed-ring microstrip antenna. M.A. Sultan p67
Microstrip port design and sidewall absorption for printed Rotman lenses. L. Musa and M.S. Smith p53
Numerical analyses of printed line antennas. H. Nakano, K. Hirose, T. Suzuki, S.R. Kerner and N.G. Alexopoulos p98

ANTENNAS (REFLECTORS)

Dielectric corrected plane reflector: an unusual solution. S. Cornbleet p377
Geometric-optic synthesis of dual-reflector antennas with distributed sources. B.S. Westcott and F. Brickell p361
Laws of geometrical optics mapping in multi-reflector antennas with application to elliptical apertures. P.-S. Kildal p445
Reflection coefficient at the feed of a radome-covered reflector antenna: a geometrical optics approach. H. Cory, P.D. Einziger and R. Sover p241
Simple primary focus feeds for deep reflectors. A.A. Kishk p169

ANTENNAS (SLOT)

Aperture field and circuit parameters of a cavity-backed slot radiator. A. Hadidi and M. Hamid p139
Cavity-backed wide slot antenna. J. Hirokawa, H. Arai and N. Goto p29
Experiments of circularly polarised printed slot array antenna. K. Nakaoka p70
Theoretical design/synthesis of slotted waveguide arrays. A.J. Sangster and A.H.I. McCormick p39

ANTENNAS (THEORY)

Equivalence of impedance and radiation properties of square and circular microstrip patch antennas. A.K. Bhattacharjee, S.R. Bhadra Chaudhuri, D.R. Poddar and S.K. Chowdhury p338
Generalised Villeneuve $\bar{n}$ distribution. D.A. McNamara p245

ANTENNAS (TIME DOMAIN)

Analysis of gating errors in time domain antenna measurements. A. Henderson, J.R. James, P. Newham and G. Morris p311

CODES AND DECODING

Error control techniques applicable to HF channels. S.D. Bate, B. Honary and P.G. Farrell p57

COMPUTER APPLICATIONS

Simple moment method program for computing scattering from complex cylindrical obstacles. J.-M. Jin and V.V. Liepa p321

DIELECTRIC MATERIALS

Analysis of power dissipation and energy storage inside a dielectric loaded cavity. G. Bertin and L. Accatino p405
Broadband method for measuring dielectric constant of liquids using an automatic network analyser. A.M. Boifot p492
Detailed measurement of scattering by a spheroidal particle having varying proportions of ice and water. A.L. Hume and L.J. Auchterlonie p351
Electronic tuning of a dielectric resonator at microwave frequencies. A. El-Moussaoui and D.P. Hewson p502
Macroscopic permittivity of dielectric mixtures with application to microwave attenuation of rain and hail. A. Sihvola p24
Transitions in open millimetre-wave waveguides. S.T. Peng, S.J. Xu and F.K. Schwering p487

DIGITAL COMMUNICATION SYSTEMS

Error control techniques applicable to HF channels. S.D. Bate, B. Honary and P.G. Farrell p57

ELECTROMAGNETIC COMPATIBILITY

Analysis of asymmetric TEM cell and its optimum design of electric field distribution. X.-D. Cai and Y.-Y. Li p191
EM wave scattering from statistically inhomogeneous and periodic random rough surfaces. D.P. Chrissoulidis p209

ELECTROMAGNETIC THEORY

Analysis of electromagnetic scattering from metallic and penetrable cylinders with edges using a multifilament current model. S. Eisler and Y. Leviatan p431
Cascaded cylinder model for predicting terrain diffraction loss at microwave frequencies. P.A. Sharples and M.J. Mehler p331
Computation of a branch-cut integral arising in transient electromagetic scattering by a perfectly conducting cylinder. K. Naishadham p367
Diffraction coefficient related to a discontinuity formed by impedance and resistive halfplanes. G. Uzgören, A. Büyükaksoy and A.H. Serbest p19
Electromagnetic diffraction by two perfectly conducting wedges with dented edges loaded with a dielectric cylinder. A.Z. Elsherbeni and H.A. Auda p225
Intrinsic mode theory of conical corrugated horns. J.M. Arnold and A. Dendane p250
Macroscopic permittivity of dielectric mixtures with application to microwave attenuation of rain and hail. A. Sihvola p24
Scattering by a perfectly conducting strip loaded with a dielectric cylinder (TM case). A.Z. Elsherbeni and M. Hamid p185
Scattering from arbitrarily-shaped objects with impedance boundary conditions. A. Sebak and L. Shafai p371
Simple integral equations for two-dimensional scattering with further reduction in unknowns. M.A. Ricoy, S.M. Kilberg and J.L. Volakis p298
Simple moment method program for computing scattering from complex cylindrical obstacles. J.-M. Jin and V.V. Liepa p321
Spectral incremental propagation (SIP) procedure for fast calculation of scattered fields from conducting bodies. G.G. Cook, A.P. Anderson and A.S. Turnbull p34
Stereographic projection of axisymmetric nonuniform lens media. S. Cornbleet p499
TE scattering from a conducting cylinder of arbitrary cross-section covered by multiple layers of lossy dielectrics. E. Arvas, Y. Qian, T.K. Sarkar and F. Aslan p425
Vertical monopoles embedded in a dielectric substrate. R.C. Hall and J.R. Mosig p462

FERRITES AND FERROMAGNETICS

Edge mode effect in the operations of waveguide twin-slab ferrite phase shifter. J. Helszajn p257

FILTERS ANI FILTERING

Analysis of power dissipation and energy storage inside a dielectric loaded cavity. G. Bertin and L. Accatino p405

INSTRUMENTATION AND MEASURING SCIENCE

Broadband method for measuring dielectric constant of liquids using an automatic network analyser. A.M. Bøifot p492
Contactless and local measurement of temperature fluctuations at 60 GHz. I. Chenerie, P.F. Combes and C. Pouit p358

MATHEMATICAL TECHNIQUES

Dyadic Green's function of electric type for inhomogeneously loaded rectangular waveguides. J. Joubert and D.A. McNamara p469
Geometric-optic synthesis of dual-reflector antennas with distributed sources. B.S. Westcott and F. Brickell p361
Modal quasistatic parameters for coplanar multiconductor structures in multilayered substrates with arbitrary transverse dielectric anisotropy. R.R. Boix and M. Horno p76
Stability criteria for harmonic injection frequency dividers. F. Sierra and J. Pérez p420

MICROSTRIP AND STRIPLINE

Capactive matching of microstrip patch antennas. M.J. Alexander p172
Coupling across gap in thick microstrip line. P. Newham p64
Modal quasistatic parameters for coplanar multiconductor structures in multilayered substrates with arbitrary transverse dielectric anisotropy. R.R. Boix and M. Horno p76
Varactor tuned microstrip ring resonators. S.H. Al-Charchafchi and C.P. Dawson p165

MICROWAVE CIRCUITS AND NETWORKS

Design of E-plane filters made easy. Jia-Sheng Hong p215
Magical microwaves; the exploitation of the century. J.R. James p1

MICROWAVE COMMUNICATIONS

Investigation into the multipath performance of self-phased array. P.V. Brennan p47
Solution of the characteristic impedance of an arbitrarily shaped TEM transmission line using complex variable boundary element method (CVBEM). Wen Geyi, Liu Xueguan and Wu Wanchun p73

MICROWAVE HEATING

Magical microwaves; the exploitation of the century. J.R. James p1

MICROWAVE INTEGRATED CIRCUITS

Computer Jesign of microwave IC transistor amplifiers. A.J. Baden Fuller and M. Runham p182
Semiconductor dipole: possible radiating element for microwave/millimetre-wave monolithic integrated circuits (MIMICs). P.D. Patel p455

MICROWAVE MEASUREMENTS

Analysis of T-junction between rectangular and circular waveguides by variational method. B.N. Das, P.V.D.S. Rao and A. Chakraborty p475
Contactless and local measurement of temperature fluctuations at 60 GHz. I. Chenerie, P.F. Combes and C. Pouit p358
Detailed measurement of scattering by a spheroidal particle having varying proportions of ice and water. A.L. Hume and L.J. Auchterlonie p351
Electronic tuning of a dielectric resonator at microwave frequencies. A. El-Moussaoui and D.P. Hewson p502
Optimisation and regularisation in microwave diagnostics of semiconductors having smooth and unsmooth functions. M.A. Hindy p293

MICROWAVE SYSTEMS

Full-wave analysis of multiconductor coupled lines in MICs by the method of lines. Z. Chen and B. Gao p399
Novel method for calculating the noise figure of microwave MESFET mixers. J. Dreifuss, A. Madjar and A. Bar-Lev p289

NUMERICAL ANALYSIS

Computation of a branch-cut integral arising in transient electromagetic scattering by a perfectly conducting cylinder. K. Naishadham p367
Diffraction coefficient related to a discontinuity formed by impedance and resistive halfplanes. G. Uzgören, A. Büyükaksoy and A.H. Serbest p19
Electromagnetic diffraction by two perfectly conducting wedges with dented edges loaded with a dielectric cylinder. A.Z. Elsherbeni and H.A. Auda p225
Laws of geometrical optics mapping in multi-reflector antennas with application to elliptical apertures. P.-S. Kildal p445
New vectorial automatic technique for characterisation of resonators. M.C. Sanchéz, E. Martin and J.M. Zamarro p147
Numerical analyses of printed line antennas. H. Nakano, K. Hirose, T. Suzuki, S.R. Kerner and N.G. Alexopoulos p98
Optimisation and regularisation in microwave diagnostics of semiconductors having smooth and unsmooth functions. M.A. Hindy p293
Radio pulse transmission along mixed paths in a stratified forest. S.S. Seker p13
Scattering from arbitrarily-shaped objects with impedance boundary conditions. A. Sebak and L. Shafai p371
Simple integral equations for two-dimensional scattering with further reduction in unknowns. M.A. Ricoy, S.M. Kilberg and J.L. Volakis p298
Solution of the characteristic impedance of an arbitrarily shaped TEM transmission line using complex variable boundary element method (CVBEM). Wen Geyi, Liu Xueguan and Wu Wanchun p73
TE scattering from a conducting cylinder of arbitrary cross-section covered by multiple layers of lossy dielectrics. E. Arvas, Y. Qian, T.K. Sarkar and F. Aslan p425

OPTICAL PROCESSING

Fabry–Perot resonator diplexer at 230 GHz. G.A. Ediss and P.R. Lawson p411

OPTICAL SYSTEMS

Lens antennas with amplitude shaping or sine condition. S. Bishay, S. Cornbleet and J. Hilton p276

OSCILLATORS

Stability criteria for harmonic injection frequency dividers. F. Sierra and J. Pérez p420

PROPAGATION IN RANDOM MEDIA

EM wave scattering from statistically inhomogeneous and periodic random rough surfaces. D.P. Chrissoulidis p209

RADIO-WAVE PROPAGATION (IONOSPHERIC)

Range estimation for SSL HFDF systems by means of a multiquasiparabolic ionospheric model. D.C. Baker and S. Lambert p120

RADIO-WAVE PROPAGATION (MICROWAVE)

Cascaded cylinder model for predicting terrain diffraction loss at microwave frequencies. P.A. Sharples and M.J. Mehler p331
Detailed measurement of scattering by a spheroidal particle having varying proportions of ice and water. A.L. Hume and L.J. Auchterlonie p351
Macroscopic permittivity of dielectric mixtures with application to microwave attenuation of rain and hail. A. Sihvola p24
Refractive multipath ray tracing model. N.H. Kheirallah, H.M. Rashwan and A.K. Aboul-Saoud p175
Statistical stability of cumulative distributions of rainfall rate in the UK. H. Fukuchi and P.A. Watson p105

RADIO-WAVE PROPAGATION (TERRAIN EFFECTS)

Radio pulse transmission along mixed paths in a stratified forest. S.S. Seker p13

SATELLITE LINKS AND SPACE COMMUNICATION

Antenna beam steering technique using dielectric wedges. H.D. Griffiths and M.R. Khan p126

STABILITY

Stability criteria for harmonic injection frequency dividers. F. Sierra and J. Pérez p420

TELECOMMUNICATION

Range estimation for SSL HFDF systems by means of a multiquasiparabolic ionospheric model. D.C. Baker and S. Lambert p120

TRANSFORMERS

Matching using double slug transformer and correction to transistor gain. J.R.G. Twisleton p219

TRANSMISSION LINES

Analysis of asymmetric TEM cell and its optimum design of electric field distribution. X.-D. Cai and Y.-Y. Li p191
Equivalence of impedance and radiation properties of square and circular microstrip patch antennas. A.K. Bhattacharjee, S.R. Bhadra Chaudhuri, D.R. Poddar and S.K. Chowdhury p338
Full-wave analysis of multiconductor coupled lines in MICs by the method of lines. Z. Chen and B. Gao p399

WAVEGUIDES AND WAVEGUIDE COMPONENTS

Analysis of T-junction between rectangular and circular waveguides by variational method. B.N. Das, P.V.D.S. Rao and A. Chakraborty p475
Complex-valued functionals in variational analysis of waveguides with impedance boundaries. M.I. Oksanen and I.V. Lindell p281
Dyadic Green's function of electric type for inhomogeneously loaded rectangular waveguides. J. Joubert and D.A. McNamara p469
Edge mode effect in the operations of waveguide twin-slab ferrite phase shifter. J. Helszajn p257
Ideal normal mode theory of a serpentine cylindrical waveguide. S.R. Seshadri p480
Open resonator for microwave application. G. Di Massa, D. Cuomo, A. Cutolo and G. Delle Cave p159
Propagation and radiation from partly filled elliptical wave guide. G.L. James p195
Reflection and transmission properties of annular slot covered by dielectric hemisphere. J.E. Wheeler and R.D. Nevels p59
Space-harmonic analysis of multidepth corrugated waveguides. M.I. Oksanen p151
Transitions in open millimetre-wave waveguides. S.T. Peng, S.J. Xu and F.K. Schwering p487
Uniqueness of numerical solutions to electric-, magnetic- and combined-field integral equations for open-ended circular waveguides. J.R. Parkinson and M.J. Mehler 269
Using metallic post and inductive diaphragms to match symmetrical five-port waveguide junction. S.P. Yeo and S.S. Tan p80

Addresses

James, J.R. Address as Chairman of the IEE Electronics Division: Magical microwaves: the exploitation of the century p1
